

LandMaster

The Smart Land Marketplace

Aggregating Land. Connecting Stakeholders. Enabling Decisions.

A full-stack digital platform for land owners, aggregators, investors, developers, tenants, consultants, and legal providers.

Platform Overview

The Problem

Land Discovery

No consolidated marketplace — land seekers rely on non professional realtors and word-of-mouth.

Title & Legal Risk

Buyers face disputed titles, acquisition schemes, litigation, and unclear ownership histories.

Stakeholder Silos

Owners, aggregators, investors, developers, and tenants operate in isolation with no shared platform.

Regulatory Blind Spots

CDP zoning, government acquisition plans, and land-use restrictions are rarely checked upfront.

Who Does It Serve?

A multi-sided marketplace connecting every stakeholder in the land lifecycle

Land Owners /
Farmers

Aggregators

Investors

Developers

Tenants /
End Users

Consultants
(IPC)

Legal
Providers

Govt /
Authorities

The Aggregator Journey

1

Identify & Approach

Talk to individual farmers/owners, map contiguous parcels near road access.

2

Verify & Aggregate

Cross-check survey numbers, check CDP zoning, ownership history, Govt acquisition schemes.

3

Due Diligence

Commission legal due diligence report + market valuation from reputed firms.

4

List on Platform

GPS linked parcel details, ownership docs, feasibility report & total acquisition cost.

5

Match & Transact

Platform matches to buyer requirements; field exec verifies discrepancies; deal closes.

The Buyer / End-User Journey

What Buyers Submit

- Land shape & size requirement
- Road access & proximity needs
- Manufacturing / processing / storage zones
- Power, water supply, waste disposal
- Pollution / licensing considerations
- Budget range & ownership/lease preference
- Mandate letter

Platform Responds With

- Verified and validated land parcels from marketplace
- CDP zone compliance for intended use
- Landmark proximity map
- Developer tie-up options (industrial park)
- Build-to-suit & lease-back options
- Legal & financial service pop-ups
- IPC consultant suggestions

Automated Verification Engine

Every listed land parcel is cross-verified against multiple government and legal sources before going live.

CDP Zoning Check

Color coding, land use classification, free zones identified in latest CDP.

Govt Acquisition Scan

Survey number cross-checked against all government acquisition & reservation schemes.

Litigation Check

Active court cases, ownership disputes, encumbrances, and pending litigation flagged.

Tax Record Verification

Government tax and katha records matched to ownership and survey data.

Village Survey Validation

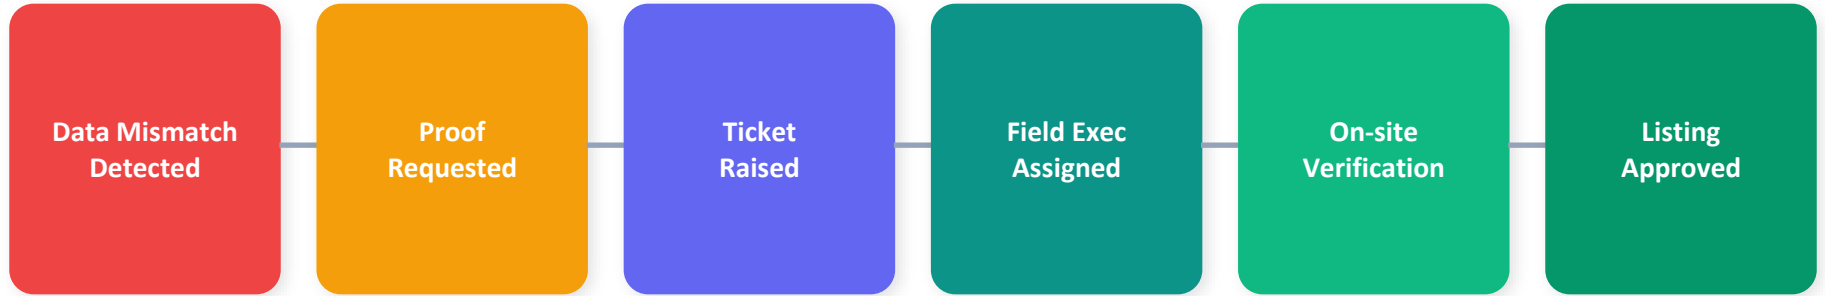

Village survey records verified for consistency with aggregator-submitted data.

Landmark Mapping

Distance to key landmarks auto-fetched via map crawl.

Discrepancy Resolution Workflow

Interactive Data Collection

- Type of land (agricultural / industrial / commercial)?
- Water logging history?
- Electricity availability & reliability?
- Source of water supply?
- Road width & access conditions?

Revenue Model

Multiple revenue streams across the transaction and service ecosystem

2%

Success Fee

Collected on every successful land transaction closed via the platform.

₹₹

Legal Services

Pop-up offers for due diligence, title verification & legal advisory.

₹₹

Financial Services

Loan facilitation, investment advisory, and funding matchmaking.

₹₹

Liason & Conversion

Land-use conversion orders, zoning approvals, licensing services.

₹₹

Rate Cards

Architects, surveyors, interior designers, facility management providers.

Key Platform Features

Smart Notifications

Users alerted when listings matching their saved requirements go live.

AI Chatbot

Profile collection on login + help desk FAQ bot for platform navigation.

Real-time News

Real Estate specific news auto-fetched from verified portals. No fake news.

Aggregation Status

End users can see latest progress on aggregation of specific land parcels.

Portal Integrations

Lawyers, architects, surveyors, interior designers, facility managers connected.

Landmark Mapping

Auto-fetch of distance to airports, highways, utilities via map crawl.

Stakeholder Tie-Up Matrix

Strategic partnerships enabled directly via the platform:

Tenant

Developer

Build-to-suit arrangements; developer builds, tenant leases.

Tenant

Investor

Investor funds acquisition and development; tenant commits to long-term lease.

Investor

Developer

Investor provides capital; developer executes the project.

Aggregator

Investor

Investor funds land aggregation for land banking or development.

End User

Legal Firm

Platform connects end users with empanelled legal providers.
